

HelpDesk Lite – AI Task Mapping

Engineering Task	AI Usage	Reason
Write Code	Yes	AI accelerates implementation of straightforward features.
Generate Unit Tests	Yes	AI produces an initial set of unit tests that developers validate.
Documentation	Yes	AI drafts technical documentation and release notes.
Code Review	Partial	AI identifies potential improvements, while developers make the final approval.
System Design	No	Architecture and design decisions remain the responsibility of engineers.
Security Review	Partial	AI detects possible security concerns, but human verification is required.

Summary

AI improves engineering productivity by automating repetitive tasks, while critical technical decisions remain under developer ownership.
